CONCUSSION AWARENESS AND SAFETY RECOGNITION POLICY

Objective

It is Special Olympics' intent to take steps to help ensure the health and safety of all Special Olympics participants. All Special Olympics participants should remember that safety comes first and should take reasonable steps to help minimize the risks for concussion or other serious brain injuries.

Defining a Concussion

A concussion is defined by the Centers for Disease Control as a type of traumatic brain injury caused by a bump, blow, or jolt to the head as well as serial, cumulative hits to the head. Concussions can also occur from a blow to the body that causes the head and brain to move quickly back and forth—causing the brain to bounce around or twist within the skull. Although concussions are usually not life-threatening, their effects can be serious and therefore proper attention must be paid to individuals suspected of sustaining a concussion.

Suspected or Confirmed Concussion

A participant who is suspected of sustaining a concussion in a practice, game or competition shall be removed from practice, play or competition at that time. If a qualified medical professional is available on-site to render an evaluation, that person shall have final authority as to the removal or return to play of the participant. If applicable, the participant's parent or guardian should be made aware that the participant is suspected of sustaining a concussion.

Return to Play

A participant who has been removed from practice, play or competition due to a suspected concussion may not participate in Special Olympics sports activities until either of the following occurs (1) at least seven (7) consecutive days have passed since the participant was removed from play and a currently licensed, qualified medical professional provides written clearance for the participant to return to practice, play and competition or (2) a currently licensed, qualified medical professional determines that the participant did not suffer a concussion and provides written clearance for the participant to return to practice play immediately. Written clearance in either of the scenarios above shall become a permanent record.

The Centers for Disease Control website www.cdc.gov/concussion provides additional resources relative to concussions that may be of interest to participants and their families.

I understand I could get Coronavirus through sports, training, competition and/or any group activity at Special Olympics. I am choosing to participate in sports, competition and/or other Special Olympics activities at my own risk. During the time that these precautions are needed, I agree to the following to help keep me and my fellow participants safe:

✓	If I have COVID-19 symptoms, I will stay at home and NOT go to any activities until 7 days after all of my symptoms are over. If I am exposed to COVID-19 and have no symptoms, I can return 14 days after exposure.
✓	Special Olympics gave me education on Special Olympics rules for COVID-19 and who is at high-risk (back).
✓	I know that before or when I get to a Special Olympics activity, they will ask me some questions about symptoms and exposure to COVID-19. They may also take my temperature. I will answer truthfully and participate fully.
✓	I will keep at least 6 feet from all participants at all times.
✓	I will wear a mask at all times while at Special Olympics activities. I may not have to wear it during active exercise.
✓	I will wash my hands for 20 seconds or use hand sanitizer before any activities. I will wash my hands any time I sneeze, cough, go to the bathroom or get my hands dirty.

✓	If I get or have had COVID, I will not go to any in-person Special Olympics events until 7 days after my symptoms end. I will go to my doctor and get written clearance before returning to any sport or fitness activities.

COVID-19 Participant Release Form

Special Olympics Wisconsin

What are symptoms of COVID-19?

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This list does not include all possible symptoms. For the most up to date listing of COVID-19 symptoms and to learn more, refer to the CDC website.

Who is at higher risk of COVID-19?

COVID-19 is a new disease and information is changing on who is more likely to get COVID-19 and who is will have more complications. Based on currently available information and clinical expertise, people with intellectual and developmental disabilities may be at higher risk of severe illness resulting in death from COVID-19.

Current clinical guidance and information from the U.S. CDC lists those at high-risk for severe illness from COVID-19 as:

- People 65 years and older
- People who live in a nursing home or long-term care facility (like a congregate or group home)

People of all ages with underlying medical conditions, particularly if not well controlled, are also at high risk:

- People with chronic lung disease or moderate to severe asthma
- People who have serious heart conditions (including heart failure, coronary artery disease, congenital heart disease, cardiomyopathy)
- People who are immunocompromised
    - Many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications
- People with severe obesity (body mass index [BMI] of 40 or higher). To calculate BMI, refer to:
    - https://www.cdc.gov/healthyweight/assessing/bmi/adult_bmi/english_bmi_calculator/bmi_calculator.html
- People with diabetes
- People with chronic kidney disease undergoing dialysis
- People with liver disease
- People with brain and spinal cord disorders (like cerebral palsy, epilepsy, stroke)

If you are at a high risk, you may be putting yourself at risk when you return to activities with Special Olympics. But, you may also put at risk your family and your teammates. If you have these conditions, you should not return to Special Olympics in person activities until there is little to no COVID-19 in your community.

If you have been diagnosed with COVID-19, you should consult with a healthcare professional for written medical clearance before returning to Special Olympics in person activities as serious cardiac, respiratory, and neurological issues may develop as a result of COVID-19.
